Isotherm And Isobar Maps Lab And Answers

In this lab you will practice drawing isotherms and isobars and locating air masses and areas of different pressures. Study the solid line that has been drawn through all the stations that have a temperature of 15 degrees C. Notice that the line sometimes goes between stations of 14 degrees and 16 degrees.

Purpose of this lab- to learn to use temperature for ...

Now it's time for your students to practice. Hand out the maps and instructions and have your students with a partner (optional) to complete the exercise. You will want to have a few extra maps on hand in case students need to start over. One idea to help your class get started is to project the map on the board and walk them through drawing in the isotherm and isobar lines.

ISOTHERM AND ISOBAR MAPS LAB ANSWER KEY PDF

A large body of air with the same characteristics of temperature and moisture content is known as an air mass. An air mass receives its characteristics from the location it forms, known as its source region. Fronts represent the advancing edge of the air mass at ground level. Only low pressure systems have fronts, due to air masses converging at the low pressure.
