I know almost nothing about Calculus (never taken any calc classes whatsoever, only College Algebra), particularly how much I need to know to be competitive in a three course Calc sequence. So I can make sure I have all my ducks in a row, what should I look to read after Morris Kline's book? What would take it to the next level?

Self Taught Calc- What to read after Morris Kline ...

Kline says exactly the opposite: the rigor is a confusing distraction, and students must first learn concepts intuitively. Spivak says that the chapters in his book should be read in order, as the book is designed to show that Calculus is a coherent subject rather than a collection of techniques.
