9% Normal Saline ( also known as NS, 0.9NaCl, or NSS) Less commonly, this solution is referred to as physiological saline or isotonic saline. This is one of the most common IV fluids because it works for most hydration needs due to vomiting, diarrhea, hemorrhage, or even shock. It's the fluid of choice for resuscitation efforts as well.

**Breaking Down IV Fluids: The 4 Most Commonly Used Types**

Different types of intravenous (IV) solution may be used in different types of conditions. Typically, there are two main types of solution that may be used: colloids and crystalloids. Human blood is considered a colloid , as well as water mixed with insoluble materials such as a gelatin.

**What are the Different Types of Intravenous Solution?**

Osmolarity is a property of particles in solution. If a substance can dissociate in solution, it may contribute more than one equivalent to the osmolarity of the solution. For instance, NaCl will dissociate into two osmotically active ions: Na and Cl. One millimolar NaCl yields a 2 milliosmolar solution.

IV Therapy Supplies including IV catheters, IV sets and extensions, IV solution bags, irrigation bottles, IV prep supplies needles and syringes; as well as a full line of medications that are available in pre-filled syringes, vials, ampules and narcotics are offered by Emergency Medical Products.

**IV Therapy Supplies & Equipment | Emergency Medical Products**

Intravenous therapy (IV) is a therapy that delivers liquid substances directly into a vein (intra-+ ven-+ -ous). The intravenous route of administration can be used for injections (with a syringe at higher pressures) or infusions (typically using only the pressure supplied by gravity). Intravenous infusions are commonly referred to as drips.

**Intravenous therapy - Wikipedia**

And osmolality less than 250 mOsm/L . • Hypotonic crystalloid solutions lowers the serum osmolality within the vascular space, causing fluid to shift from the intravascular space to both the intracellular and interstitial spaces. • These solutions will hydrate cells, although their use may deplete fluid within the circulatory system. 37.
