Latitude, Longitude, and Hemispheres

Best Answer: Hi Anon,..To understand longitude. you start with the premise that the world is round,..Then you need to know that there are 360 degrees in a circle. So if you stood at the north pole, & drew 360 lines, each pointing away from the pole, each line being 1 degree, from each line to the line next to it, all of these lines would be pointing south, that is, away from the north pole.

Best Answer: Longitude are the 'vertical' lines on a map and imaginary lines on the earth used to calculate distance east or west. Greenwich village near London is thought of as the central point (0 degrees). Latitude are the 'horizontal' lines - they are used to calculate distance north or south of the equator (a line of latitude around the 'middle' of the world - 0 degrees).

What is longitude and latitude? | Yahoo Answers

A circle of latitude on Earth is an abstract east-west circle connecting all locations around Earth (ignoring elevation) at a given latitude.. Circles of latitude are often called parallels because they are parallel to each other; that is, any two circles are always the same distance apart. A location's position along a circle of latitude is given by its longitude.

Circle of latitude - Wikipedia

For the best answers, search on this site <https://shorturl.im/avhfX> The planet's four hemispheres are shown on the map above, and each is shaded a dark gray. The Equator, that imaginary horizontal line at 0° degrees latitude at the center of the earth, divides the earth into the Northern and
