### **What are the sizes used for the iOS application splash screen?**

A touchscreen, or touch screen, is an input device and normally layered on the top of an electronic visual display of an information processing system. A user can give input or control the information processing system through simple or multi-touch gestures by touching the screen with a special stylus or one or more fingers.

### **Touchscreen - Wikipedia**

Touch Input. The display hardware periodically captures data from sensors embedded in the screen. When a user touches the screen, the sensor information is recorded, processed, and delivered to UIKit. On displays that support 3D Touch, additional information about how much pressure the user applied to the display is also recorded.
