Life on Planet Ocean: Present, Past and Future Nancy Knowlton Oceans cover over 70% of the planet and profoundly influence many crucial physical and biological processes. Life began in the sea, and two thirds of the major forms of animal life are either primarily or exclusively marine. About half of the human population lives within 200 km of ...

### **Life on Planet Ocean: Present, Past and Future**

The ocean does not contain much plant life, because concentrations of critical nutrients are lower than they are on land. Phosphorus and nitrogen, for example, are present at only 1/ 10,000 of their concentration in fertile soil. As a consequence, the ocean supports only a small fraction of what can be grown on reasonably productive land.

### **Life in the Ocean**

Ocean Worlds Water in the Solar System and Beyond. The story of oceans is the story of life. Oceans define our home planet, covering the majority of Earth's surface and driving the water cycle that dominates our land and atmosphere.

### **Extreme Ocean Animals Life Under the Sea Documentary 2016**

Unlike other ocean documentaries, such as Deep Sea, Planet Ocean does not focus on specific ecosystems or pockets of life, but rather on the entire planet as an ecosystem. While the film does guide us through various series of events (sailfish relying on mackerel; mackerel relying on zooplankton; zooplankton relying on marine prairie) it is not ...
