To learn how to do this, you can read the Double-Check Your Formulas lesson from our Excel Formulas tutorial. To create a formula using the point-and-click method: Rather than typing cell addresses manually, you can point and click on the cells you want to include in your formula.

Excel Formulas: Simple Formulas - edu.gcfglobal.org

In this lesson, you learned: A function is a shorthand way to write an equation that performs a calculation. A formula with a function has three parts: an equal sign, a function name, and for most functions one argument, which acts as an operand. The best way to select a function is from the Insert Function dialog box.
