Light from a Distant Star is the moving and powerful story of innocence and betrayal told in the endearingly wise voice of 13-year-old Nellie Peck. It is early summer, and her beloved father's business is failing. Her mother has to go back to work, and Nellie's older half sister has launched a

troubling search for her birth father. ...

### **Light from a Distant Star (Audiobook) by Mary McGarry ...**

A gravitational lens is a distribution of matter (such as a cluster of galaxies) between a distant light source and an observer, that is capable of bending the light from the source as the light travels towards the observer. This effect is known as gravitational lensing, and the amount of bending is one of the predictions of Albert Einstein's general theory of relativity.

### **Gravitational lens - Wikipedia**

True that the light that we are seeing from more distant stars started on its voyage to earth in the distant past. Light from a star that is 4.3 light years from earth (the closest star) has been traveling for 4.3 years to get here. The most distant galaxies that we have seen directly are billions of light years from earth.
