Step 1: Create a list of words that remind you of pollution and words that remind you of a clean environment. Step 2: Sort the words into the two categories using a T-chart or another organizational chart. Activity 2: Illustrating Pollution Solutions. Step 1: Have students think of one way they can help to keep our air, water, and land clean.

Pollution Solutions | Scholastic

While many of the solutions for water pollution need to be applied on a broader macro-level, we have listed seven simple water pollution solutions that individuals, companies, and communities can take to have a significant and responsible impact on the water quality around them.

Water Pollution Solutions | 7 Simple Solutions

Water pollution is the contamination of water bodies, usually as a result of human activities. Water bodies include for example lakes, rivers, oceans, aquifers and groundwater. Water pollution results when contaminants are introduced into the natural environment. For example, releasing inadequately treated wastewater into natural water bodies can lead to degradation of aquatic ecosystems.

Water pollution - Wikipedia

Pollution is the introduction of contaminants into the natural environment that cause adverse change. Pollution can take the form of chemical substances or energy, such as noise, heat or light. Pollutants, the components of pollution, can be either foreign substances/energies or naturally occurring contaminants. Pollution is often classed as point source or nonpoint source pollution.
