Virtual Lab: Le Chatelier's Principle Inquiry. BACKGROUND: Equilibrium exists when the rates of the forward and reverse reactions are equal. When a stress is added to the reaction, the rates are no longer equal. The reaction will proceed in such a way to make the rates back to equal and establish a new equilibrium. This is known as LeChatelier ...

**Lab 3 Le Chateliers Principle - Green River College**

In this experiment you will be introduced to chemical equilibrium. You will then be presented with a number of systems at equilibrium and will be asked to "stress" these systems by changing the concentration of one of the reactants or products or by changing the temperature of the system.

### **Equilibrium and LeChatelier's Principle**

Le Chatelier's Principle states that if an equilibrium system is subjected to a stress, the system will react to remove the stress. To remove a stress, a system can only do one of two things: form more products using up reactants, or reverse the reaction and form more reactants, using up products. In this experiment you will form a
