Possible answer: The Substitution Property states that if  $a = b$ , then  $b$  can be substituted for  $a$  in any expression. Applying the Symmetric Property to the Substitution Property shows that if  $b = a$ , then  $a$  can be substituted for  $b$  in any expression. So if  $a = b$  and  $b = c$ , then  $a = c$  by the Substitution Property, and this is also the Transitive Property.
