width versus device-width. In CSS media the difference between width and device-width can be a bit muddled, so lets expound on that a bit. device-width refers to the width of the device itself, in other words, the screen resolution of the device. Lets say your screen's resolution is 1440 x 900. This means the screen is 1440 pixels across, so it has a device-width of 1440px.
