Ipad Retina Display Resolution Dpi

DPI in Retina iPad app design. The dpi of an iPad just represents the number of pixels for each inch of screen, and therefore doesn't according to my brain have anything to do with the dpi of the PSD. Especially since it already is in the 2048×1536 size required for Retina.

ios - DPI in Retina iPad app design - Stack Overflow

Retina display is a brand name used by Apple for its series of IPS LCD, and OLED displays that have a higher pixel density than traditional Apple displays. Apple has applied to register the term "Retina" as a trademark in regard to computers and mobile devices with the United States Patent and Trademark Office, Canadian Intellectual Property Office, and in Jamaica.

Retina display - Wikipedia

A Resolution and Pixel Density Comparison of Apple's Retina Displays to Date. As you can see, the new Retina iMac offers the lowest pixel density, measured in pixels per inch, of any Retina display to date. Conversely, the iPhone 6 Plus sports nearly twice the pixel density of the Retina iMac, and a roughly 23 percent improvement over the iPhone 4,...

Resolution & Pixel Density Comparison of Apple Retina Displays

Apple's brand new iPad has just launched with a Retina display! The resolution is 2048 x 1536, quadrupling that of the first and second generation iPads. You might not think that's quite enough to merit Apple's designation of a Retina display — one dense enough to make individual pixels indistiguishable — however Phil Schiller explained that the iPad is expected to be held at a distance of 15 inches away from the user's eyes, qualifying it for that title.

New iPad has Retina display, 2048 x 1536 resolution - The ...

The next iPad features a display resolution of 2048 x 1536. This is four times the number of pixels on the original iPad and iPad 2. Apple calls this the Retina display because it features 264 pixels per inch (ppi). This density means that individual pixels can't be distinguished at 15 inches away.

What is the resolution of the iPad Retina display? | The ...

The 72 dpi you hear a lot results from 1) the misunderstanding about dpi and ppi (dots and pixels) and 2) monitors historically having a resolution of 72 ppi. By the way, modern monitors have much more — the Retina display of the new iPad uses 264 ppi.

Ideal resolution for pictures when designing for the iPad ...

Retina is Apple's trademark for a display so sharp that the human eye is unable to distinguish between pixels at a typical viewing distance. As Steve Jobs said: "It turns out there's a magic number right around 300 pixels per inch, that when you hold something around to 10 to 12 inches away from your eyes,...

Is This Retina? - DPI/PPI Display Calculator

To start, Soneira addresses the fact that the iPhone 4/4S Retina display has a pixel density of 326 ppi (pixels per inch), whereas the new iPad comes in at just 264 ppi. "To qualify as an Apple retina display, the new iPad does not require the same ppi as the iPhone 4 Retina display...

Apple's New Retina Display: Do All Those Pixels Matter ...

This gives the iPad Mini 2, iPad Mini 3 and iPad Mini 4 a pixels-per-inch (PPI) of 326 compared to the 264 PPI in the 9.7-inch models. Even the higher resolution 10.5-inch and 12.9-inch iPad models work out to 264 PPI, which means the iPad Mini models with a Retina Display have the highest pixel concentration of any iPad.

What is Your iPad's Screen Resolution - Lifewire

Mac computers with Retina display. These Mac computers come with a built-in Retina display: MacBook Pro (Retina, 13-inch, Late 2012) and later displays have a 2560-by-1600 native resolution at 227 pixels per inch with support for millions of colors. MacBook Pro (Retina, Mid 2012) and
